

Ästhetische Zahnregulierung mit Incognito-/Lingual-Technik

Korrekturen mit Lingualtechnik, speziell Incognito-System

Finden Sie auf den folgenden Bildtafeln - oder in einer anderen unserer Bildergalerien - eine Zahnsituation, die Ihrer eigenen Fehlstellung ähnelt, und sehen Sie, wie und in welcher Zeit Dr. Grimmel diese mit der Incognito- oder Lingual-Technik korrigiert hat. Alle diese Korrekturen erfolgten also mit innen-/zungenseitigen Brackets und Bögen, massgeschneidert auf die jeweilige Patientensituation. Viele Patient/Innen entscheiden sich inzwischen für die zungenseitige Incognito-Zahnspange. Sie ist zur Zeit die absolut präziseste und diskreteste Technik um Zähne zu bewegen.
